

NOTICE OF CONSTRUCTION

Reservoir Fill Line, Utilities and Road Upgrades

September 21st, 2026

Dear Residents,

This notice is to inform you of upcoming road grading and manhole adjustment work on Tunasa Drive and Tunasa Crescent, beginning the week of September 21st. Crews will start at the east end of Tunasa Drive near Mouse Mountain, including the east end of Simon Fraser Avenue, and work westward toward Carrier Crescent before continuing down Tunasa Crescent.

During Road Grading

- Please slow down and drive with caution through active work areas.
- Please drive respectfully on freshly graded roads so that we can preserve the new condition and keep the project on track for paving.
- Limit driving on graded roads to what is necessary to access your property.

Manhole Adjustments

Once grading is complete up to Carrier Crescent on Tunasa Drive, crews will begin adjusting the storm and sanitary sewer manholes to match the new road height ahead of paving. This involves digging around each manhole, installing a riser section to raise it, and pouring concrete to hold it in place. This work will take place over several days.

- This will create temporary holes in the road, which will be clearly marked off for safety.
- Crews will do their best to keep at least one lane open in the work area at all times.

Stephen Vickers	250-608-8425
